3.1 Retrieving posted data from TYPO3

It is possible to retrieve the posted data from the TYPO3 installation by exporting it as an Excel- or CSV-file. By selecting Powermail in the left hand TYPO3 page tree menu, and then selecting the page on which the postings are stored in, all postings will be listed. At the top of the list you will find two icons, one for exporting to Excel and the other for exporting the data as a CSV-file (can then be opened in any table software if Excel is not available).
