7.1 Adding Youtube video on your website using Plain HTML element

It is possible to add a Youtube video on your website, by using the embed function on youtube.com. This will create a video player as shown below. (img 7.1.1)

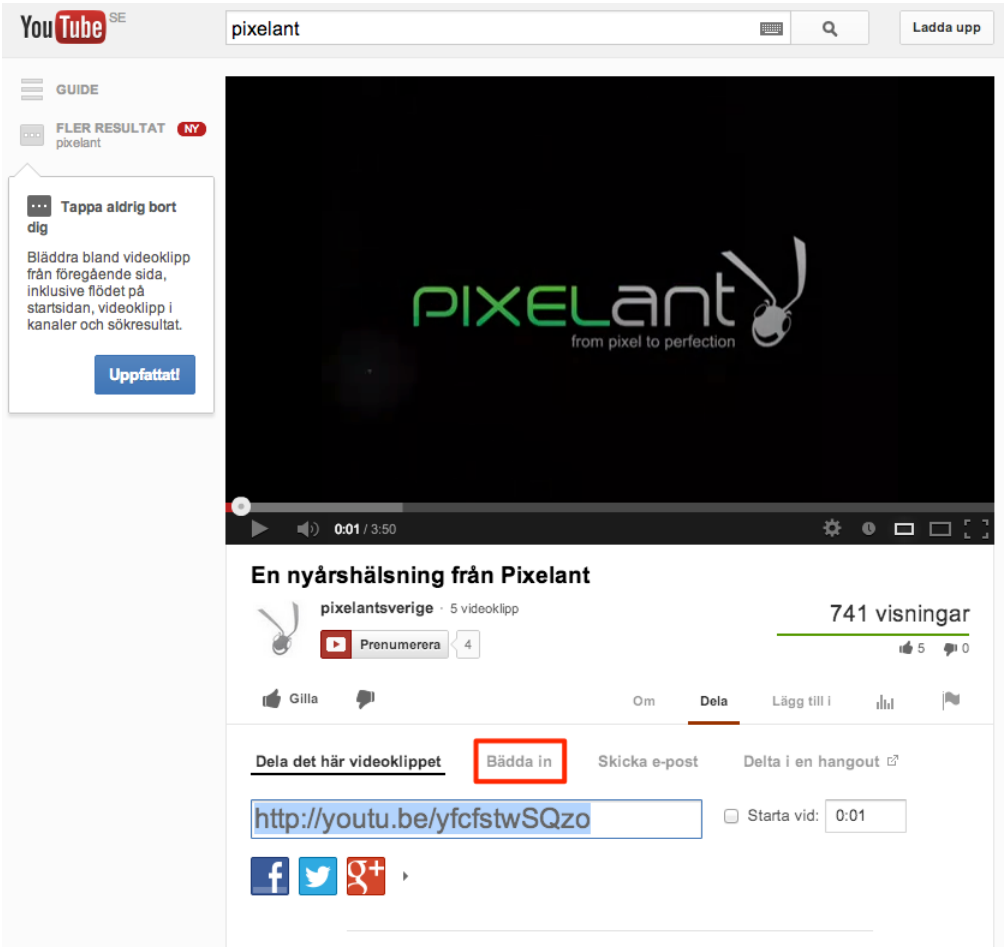

7.1.1

Go to the Youtube website and find the video you wish to use. Below the video you click the Share (Dela) link. (img 7.1.2)

7.1.2

Now click on the link Embed (Bädda in) to access the code used to insert the video clip on your website. (img 7.1.3)

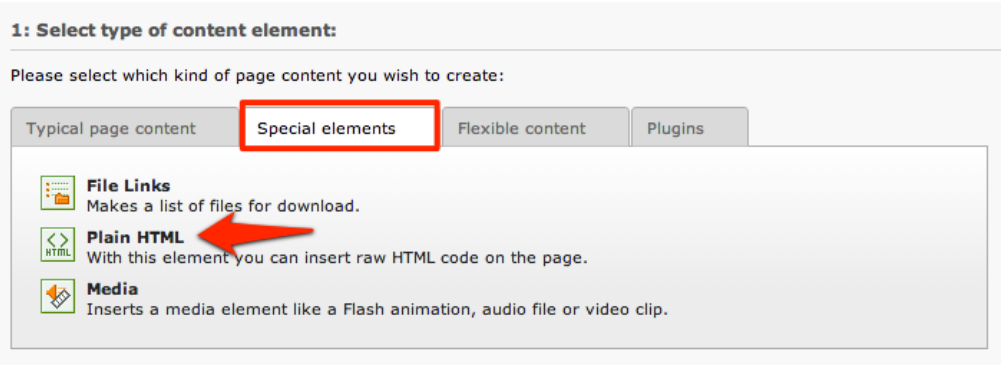

7.1.3

If you need to adjust the width of the video, this can be done below the code field. After adjusting, copy the code. (img 7.1.4)

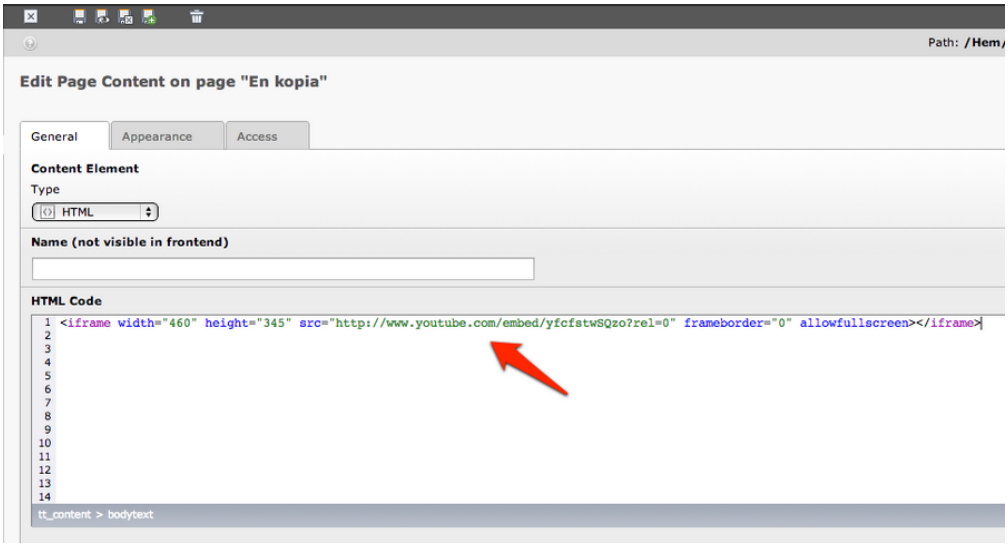

7.1.4

Now go to your TYPO3 website and add a new element. Select Plain HTML under the tab Special elements. (img 7.1.5)

7.1.5

Add the copied code in the field as shown below, save and close. (img 7.1.6)

7.1.6
