

5.2.1 Special menus

Start with creating the 'Special menus' element in the page content, below 'Special elements'. (Img. 5.2.1.1)

New content element

Please select the type of page content you wish to create:

Typical page content	Special elements	Form elements	Plugins	Content elements	Custom elements	Grid Elements
Special Menu Creates a menu of pages, sitemap or other special menus.						
Plain HTML With this element you can insert raw HTML code on the page.						
Divider This element inserts a visual divider, which is by default a horizontal line.						
Insert records With this element you can embed other content elements.						

5.2.1.1

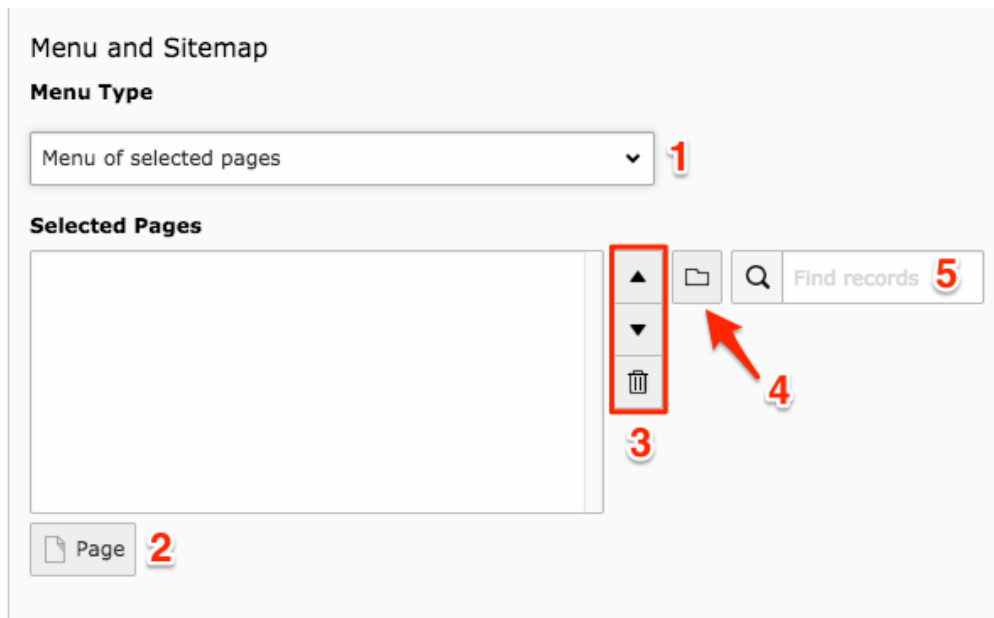

Below the 'General' tab you can add a header (1) in the first section. Continue down for more settings. (Img. 5.2.1.2)

General	Appearance	Access	Accessibility	Categories	Grid Elements
Content Element					
Type					
<div>Special Menu</div>					
Column					
<div>Content</div>					
Header					
<div>Header</div>					
<div>1</div>					
Type					
<div>Default</div>					
Link					
<div></div>					

5.2.1.2

The lower section below the 'General' tab contains the settings for the special menu. It is possible to select the type of menu (1), select pages to list through the page tree (2), sorting the list/deleting objects (3), another option to select pages to list through the page tree (4) and searching pages through page title (5). (Img. 5.2.1.3)

5.2.1.3

The different types of menus are:

- **Menu of selected pages**, shows a list with link to selected pages.
- **Menu of subpages of selected pages**, shows links to subpages of selected pages in a list.
- **Menu of subpages of selected pages including abstracts (if available)**, shows links to subpages of selected pages in a list and also text provided in Abstract field of page.
- **Menu of subpages of selected pages including sections (if available)**, shows links to subpages of selected pages in a list and content headers if content is marked for section menus.
- **Sitemap**, generates a dynamic sitemap of the whole website.
- **Sitemaps of selected pages**, generates a dynamic sitemap of subpages of selected page.
- **Section index (page content marked for section**

menus, if available), shows the content headers as a linked list from selected page.

- **Recently updated pages,** will show all newly updated sub pages selected page/pages.
- **Related pages (based on keywords),** shows pages with relatable keywords based on the keywords from the page the element is placed on.
- **Pages for selected categories (if available),** shows pages connected to a category set in the element.
- **Content for selected categories (if available),** shows content connected to a category set in the element.

NOTE! Pages with page setting 'Hide in menu' are not possible to display in this type of menu.

Selected pages will be shown in the field below. They can be organised by marking the pages in 'Selected Pages' and using the arrows on the right hand side of the field to move them up and down in the order. To remove a page from the selection, mark it and use the trash bin icon. (Img. 5.2.1.4)
