News Module TYPO3 version 6+

Here we go through the steps how to create news articles on your website. It is very important to keep in mind, that the news module contains different parts. First there is the page or pages on the website that contains the so called plugin, which collects information from the News-folder in at the bottom of the TYPO3 pagetree. The news articles are always created in that folder. The pages containing the plugins should never be altered, because it could make the flow cease to function.
