# 2.4 Parallax element

...rallax element example

It is possible to add text on top of the image.

Nulla tempus, magna eu imperdiet pharetra, turpis eros iaculis turpis,
eget hendrerit dui justo eu quam. Fusce posuere tellus at lacus lobortis
faucibus. Donec faucibus eros quis ullamcorper ultrices. Nulla egestas
ultrices ullamcorper. Interdum et malesuada fames ac ante ipsum primis
in faucibus. Quisque nulla eros, hendrerit nec ullamcorper id, suscipit
eget diam. Duis iaculis ut velit vitae fringilla. Mauris feugiat tincidunt tempus.

To create the 'Parallax' element you need to choose it in 'Grid Elements' tab when creating a new element. (2.4.1)

New content element

Please select the type of page content you wish to create:

Two columns grid
Preset row with two columns.

Three columns grid
Preset row with three columns.

Four columns grid
Preset row with four columns.

Advanced one column grid
Advanced grid. Preset row with one column. Column width can be adjusted.

Advanced two columns grid
Advanced grid. Preset row with two columns. Column width can be adjusted.

Advanced three columns grid
Advanced grid. Preset row with three columns. Column width can be adjusted.

Advanced four columns grid
Advanced grid. Preset row with four columns. Column width can be adjusted.

Collapsible
A collapsible container for content elements

Group of collapsibles
A group for collapsible elements

Parallax
Background image with Parallax effect

Simple Accordion
Container with collapsible child elements, which can either be single elements or containers as well

Slider container
Slider container for content elements

Group of tabs
A container for tab content elements

Tab
A tab with content elements

2.4.1

In the 'General' tab you can see that the content element type 'Grid Element' (1) and grid layout 'Parallax' are selected (2). The element also uses the regular header field (3) and a link field (4), where you can insert the site or page you want to link to. In the field 'Plugin Options' you are able to set the height of parallax element (5). When this field is set to 'Auto', the height will adjust to the content inside. (2.4.2)

2.4.3

After you 'close and save' the 'Parallax' element, you'll see the
area where you can add a new element (it can be some header
and text with the use of for example 'Regular Text Element').
