

5.3 Menu

The 'Menu' tab allows you to present a menu (list of links) in different ways, based on selected pages, subpages or categorised pages (5.3.1)

New content element

Please select the type of page content you wish to create:

The screenshot shows the 'New content element' dialog in the TYPO3 backend, with the 'Menu' tab selected. The dialog has a top navigation bar with tabs: 'Typical page content', 'Content elements', 'Form elements', 'Menu' (selected), 'Plugins', and 'Special elements'. Below the tabs is a 'Grid Elements' section containing a list of menu options, each with an icon and a description:

- Abstracts**: Menu of subpages of selected pages including abstracts
- Categorized content**: Content elements for selected categories
- Categorized pages**: Pages for selected categories
- Pages**: Menu of selected pages
- Subpages**: Menu of subpages of selected pages
- Recently updated pages**: Menu of recently updated pages
- Related pages**: Menu of related pages based on keywords
- Section index**: Page content marked for section menus
- Section index of subpages from selected pages**: Menu of subpages of selected pages including sections
- Sitemap**: Expanded menu of all pages and subpages for selected pages
- Sitemaps of selected pages**: Expanded menu of all subpages for selected pages

5.3.1

Abstracts - shows links to subpages of selected pages in a list and also text provided in Abstract field of page.

Categorized content - shows content connected to a category set in the element.

Categorized pages - shows pages connected to a category set in the element.

Pages - shows a list with link to selected pages.

Subpages - shows links to subpages of selected pages in a list.

Recently updated pages - will show all newly updated sub pages selected page/pages.

Related pages - shows pages with relatable keywords based on the keywords from the page the element is placed on.

Section index - shows the content headers as a linked list from selected page.

Section index of subpages from selected pages - shows links to subpages of selected pages and content headers of as a linked list of those selected pages.

Sitemap - generates a dynamic sitemap of the whole website.

Sitemaps of selected pages - generates a dynamic sitemap of subpages of selected page.

NOTE! Pages with page setting 'Hide in menu' are not possible to display in this type of menu.

When you decide what type of menu you want to have, go to the 'General' tab (5.3.2) - there you can see that, for example, the content element type 'Abstracts' is selected (1).

The element uses the regular header field (2), which can be linked to any url, file or page (3), you can also add a subheader (4). In the 'Selected Pages' field (5) you can select pages to list through the page tree (6), (7) or by searching in the search field above. Selected pages will be shown in the field below (8) and they can be organised by using the arrows on the right hand side of the field (9) to move them up and down in the order or to remove a page from the selection (you need to mark it and use the necessary icon on the right hand side of the field).
