

3.7 Linking to telephone number

Sometimes you want a phone number to be linked, so you can call directly by clicking on it (especially when viewing the website on a mobile device).

To do this, write the number as you wish it to be displayed on the web, and then mark it and create a link. (3.7.1)

3.7.1

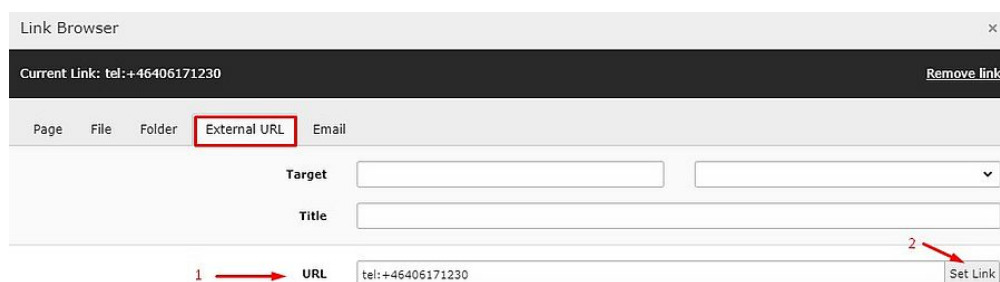

After marking the text and clicking the Insert link icon, select the 'External URL' tab and write tel: and then a number (1).

Example: tel:+46406171230

NOTE! There should be no space or dashes in the number.

Including the country code, is also suggested.

At the end apply with 'Set link' (2). (3.7.2)

3.7.2
